Shop Billing software

GST ready.
Available Offline / Online

Shop Billing Software:

Shop billing software designed to meet the fast billing of purchase and sales of different shops which is very convenient and reliable and fast, suitable in general store and retail shops etc. Here it has provision for reverse and forward billing system which you can choose whichever suits, Forward billing system bill calculation decides on the basic rate of product where as Reverse billing system calculation decides on the net rate and basic rate automatically calculated. In every sales or purchase of goods it tracks the payment logs of the customer, so it easy to track pending balance.
It also saves time while adding products, instead of adding product one by one, you can have provision for upload bulk products through excel. Discount provision available for order management. Different report are available to track every order and purchase, also tracks all GST data.
